**Subject:** West Lake Landfill - GCPT Work Plan

**Categories:** EZ Record - Shared

Good afternoon Audrey,

As I mentioned in our discussion earlier this week, Bridgeton Landfill submitted the Gamma Cone Penetration Test Work Plan with its North Quarry Contingency Plan Part 2 submission yesterday. That document was posted to the extranet site where weekly and monthly reports are posted, and was also posted to Bridgeton Landfill's website (<http://www.bridgetonlandfill.com/content.aspx?page=OfficialReports>). The GCPT Work Plan is Appendix D of that document, and the Health and Safety Plan for the GCPT is Appendix E.

MDNR has indicated to our team that they will be expediting review of the work plan to allow the GCPT to move forward as soon as possible. While I know the EPA team is very busy, we would appreciate any assistance EPA could offer in helping us move this forward. Because the GCPT is necessary to define the feasible alignment for the contingent isolation barrier, we would like to get the work completed and continue progress with developing that contingency element.

Please let me know if you have any questions or need any additional information from us.

Thank you,  
Jessie
